**Name**

Student name: Vince Matthew Caballero  Coding pair: Jezriel Micah Yap

# Handout 2 · Skills audit and goals

There are no wrong answers. Ratings are used only to form coding pairs and plan support; they are not shared with other students.

## Part A · Rate yourself (tick one box per row)

| Area | 1 · New to this | 2 | 3 · Getting there | 4 | 5 · Confident |
|---|---|---|---|---|---|
| **Coding** | ☐ Never written code, or only copied it | ☐ | ☐ Can edit code and fix simple errors | ☐ | ☑ Write small programs from scratch |
| **Maths** | ☐ Uncomfortable with numbers and graphs | ☐ | ☑ Comfortable with percentages and charts | ☐ | ☐ Enjoy algebra and statistics |
| **Data** | ☐ Rarely use spreadsheets | ☐ | ☑ Can sort, filter and chart a spreadsheet | ☐ | ☐ Have cleaned or analysed datasets |
| **My creative discipline** | ☐ Just starting out | ☐ | ☐ Have a portfolio in progress | ☐ | ☑ Have exhibited, published or had clients |

**My creative discipline is:** Programming and Designing
**Software/tools I already use:** Affinity Studio, Astro.js, HTML, CSS, JavaScript

## Part B · Two goals

A good goal is specific, check-able by someone else, and realistic in the time.

| Goal | Write it here | How will I know I've achieved it? |
|---|---|---|
| **Skill goal · by Week 7** | I want to be able to call myself familiar and proficient in programming and working with datasets and machine learning models | I will have made a fully-fledged initial project as proof that I have learned enough to make something |
| **Creative goal · by Week 14** | I want to have made a project that will use data and information to help me and others make more environmentally-conscious and sustainable choices; either individually or at a large scale. | My output will have helped me improve a lifestyle or a practice of mine so that I would be less wasteful of the things I have around me. |

*Example skill goal: "I can load my own images into a notebook and apply three effects without help."*

## Part C · Anything we should know? (optional, confidential)

Laptop access, work or caring commitments, access needs, or anything else that could affect your learning:

## Part D · Setup checklist — tick all six before you leave

- ☑ My Google account works and Colab opens
- ☑ Week 1 demo notebook saved in my Drive
- ☑ Joined the class Q&A channel
- ☑ R&D journal created (document, sketchbook or blog)
- ☑ Poster from the lab saved in my journal
- ☑ I know the code clinic and office-hour times

### Where to get help

**Coding pair** — rotates every three weeks. **Code clinic** — every tutorial slot from Week 2. **Q&A channel** — post the error message and what you tried. **Office hours** — book through the timetable.
